

SEHAT SAHARA

AI Development Build Guide

Tool-agnostic implementation master guide with UI references • React + TypeScript + Tailwind

Connected Patient • Doctor • Community • Hospital/Clinic • Admin • AI • Backend • Demo Automation

Locked MVP Boundary

Included: Patient PWA, Doctor PWA, shared Blood and Things Sharing, three facility dashboard variants on one SaaS codebase, Admin dashboard, four shared AI contracts, sync backend, and one frontend with STATIC / DEMO / API services. **Excluded:** old 280-screen enterprise Hospital scope, pharmacy, lab operations, CRM, IPD/beds, camps/social feed, subscriptions and advanced finance.

Roles and Permissions

Actor	Can	Cannot
Patient	Book, track token, share selected files, community	Browse provider/admin data
Doctor	Consult, note, prescribe, apply to eligible jobs	Browse unapproved patient drive; self-verify
Student provider	Role-filtered supervised opportunities (architecture only)	Independent consult/prescribe in MVP
Facility	Bookings, patients, consent-gated files, hiring	Create own account; alter PMDC
Admin	Verify doctors, create facility accounts, moderate	Provide clinical diagnosis
AI	Triage guidance, note draft, authorized-file summary, admin assist	Make final medical/admin decisions

Shared Data and Service Modes

Layer	MVP responsibility
Frontend/local	Medicine reminder, filters, simple settings, basic SOS presentation
Backend	Auth, users, verification, facilities, appointments, tokens, record shares, prescriptions, jobs/applications, Blood, Things, moderation, notifications
AI API	Triage; consultation note draft; authorized record summary; admin verification/moderation assist
STATIC	Local deterministic seed data
DEMO	Seeded automatic responses and controlled transitions
API	Real backend implementation through same service interface

Frontend Rules

MobileAppShell: mobile w-full h-screen, no outer border/radius; inner content scrolls; md+ centered max-w-[400px] h-[850px] mx-auto rounded-[40px] shadow-2xl border-[8px] border-gray-900 overflow-hidden relative; neutral outside background. Bottom nav max five. **DashboardShell:** persistent sidebar, top bar, responsive content, cards/tables/drawers; never a phone mockup.

Suggested Folder Structure

Path	Purpose
src/app	routes, shells, providers
src/features/patient doctor community hospital admin	feature screens and hooks
src/components	approved shared cards, buttons, nav, consent and status components
src/services	Service interface + static/demo/api implementations

Path	Purpose
src/models	TypeScript domain models
src/ai	typed AI contracts and safety adapters
src/demo	seed data, scenario clock, deterministic events
src/tests	route, permission, contract and visual regression tests

Core TypeScript Models

```
type ProviderRole = "DOCTOR" | "STUDENT"; type FacilityType = "BASIC_CLINIC" | "POLY_CLINIC" | "HOSPITAL"; type ServiceMode = "STATIC" | "DEMO" | "API"; type BloodState = "OPEN" | "RESPONDED" | "FULFILLED" | "CLOSED"; type ItemState = "AVAILABLE" | "REQUESTED" | "BORROWED" | "RETURNED" | "CLOSED";
```

Service Abstraction

UI → feature hook/store → SehatSaharaService → StaticService | DemoService | ApiService. Every mutation accepts an idempotency key; DEMO emits controlled events using the same response models as API.

Minimum Backend Entities and APIs

Domain	Entities / APIs
Identity	users, sessions, roles; /auth, /users
Verification	doctor_verifications, documents; /verifications
Facility	facilities, facility_users; /facilities
Care	appointments, tokens, prescriptions; /appointments, /tokens, /prescriptions
Consent	record_shares, approved_files, PIN hash, expiry; /record-shares
Hiring	jobs, applications; /jobs, /applications
Community	blood_requests/responses, items/borrow_requests, reports; /community/*
Notifications	outbox/events; /notifications
AI	/ai/triage, /ai/consult-note, /ai/record-summary, /ai/admin-assist

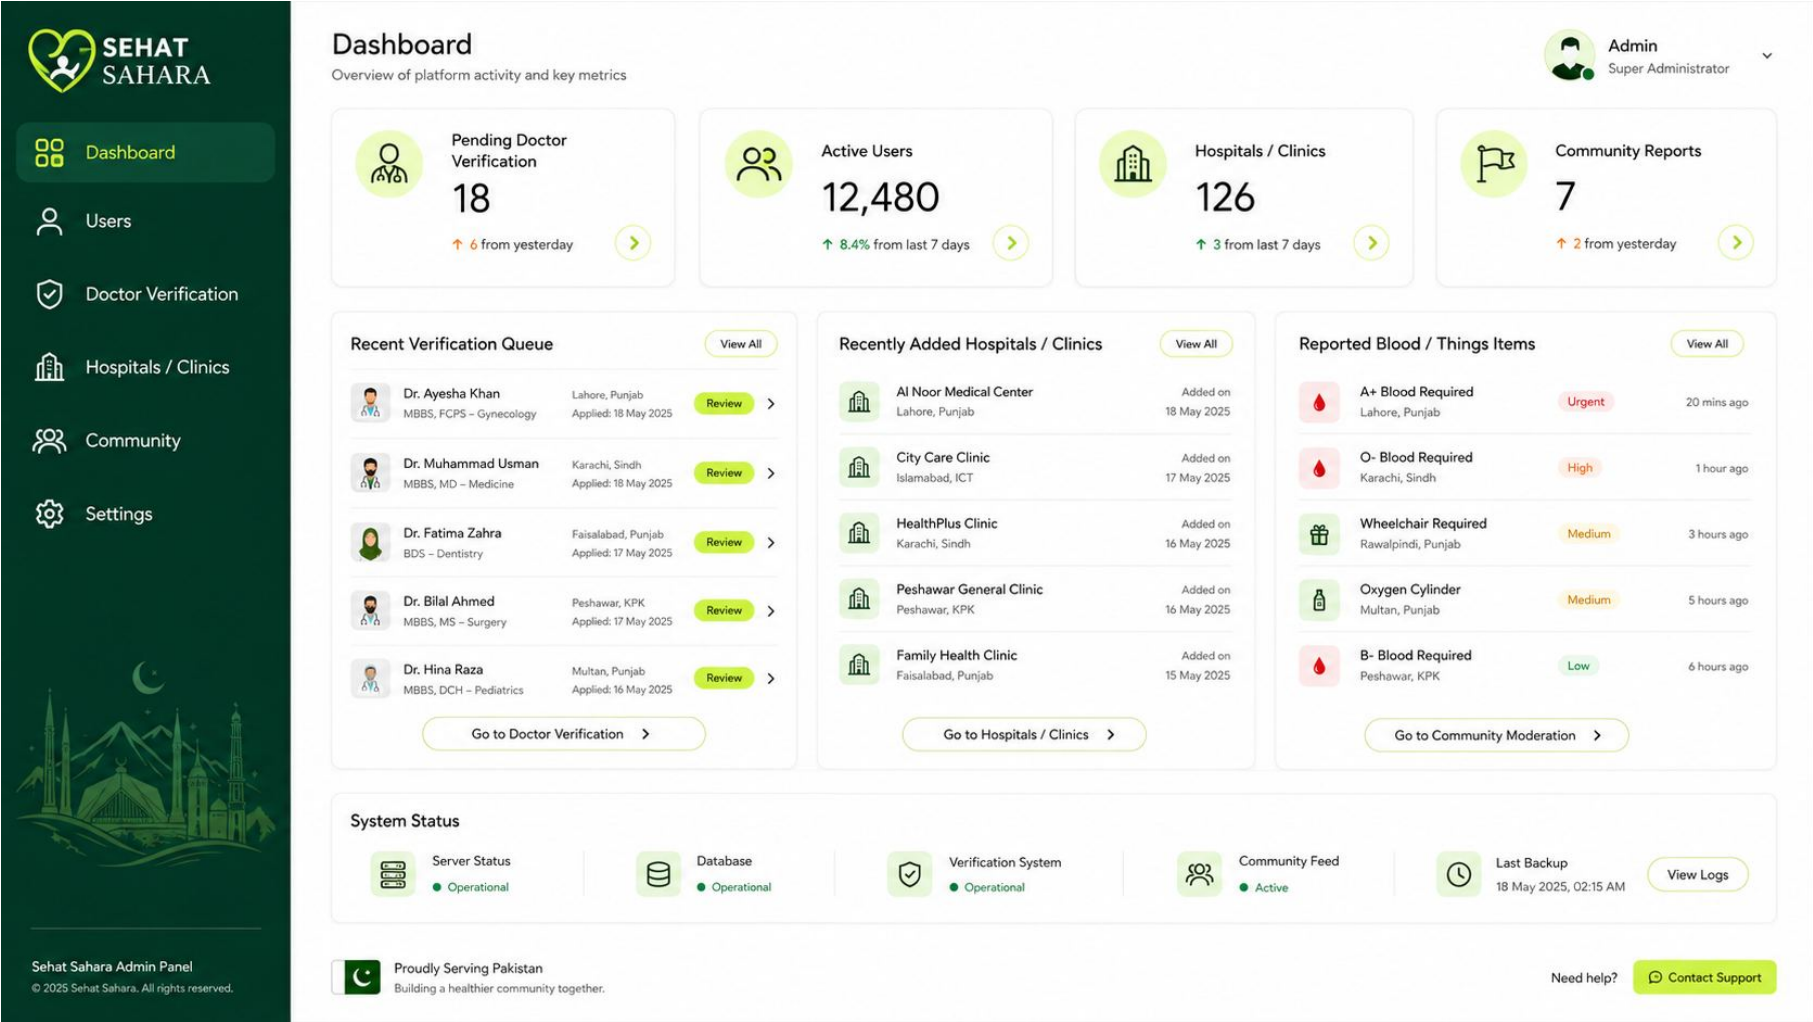

AI Contracts and Safety

Contract	Input	Output / guardrail
Triage	symptoms, age range, red flags	severity, questions, safe next step; never diagnosis
Consult note	doctor transcript/notes	structured draft; requires doctor approval
Record summary	authorized file IDs + text	cited summary; reject expired/revoked scope
Admin assist	document OCR/report evidence	flags/confidence only; Admin decides

Demo Seed Scenarios

Trigger	Controlled DEMO outcome
Create booking	CONFIRMED → CHECKED_IN → QUEUED → COMPLETED
Publish job	3 role-safe seeded applicants after short deterministic delay
Create blood request	one eligible donor response; request remains OPEN until requester fulfills
Request item	owner accepts; state REQUESTED → BORROWED → RETURNED
Submit verification	moves to Admin queue; no automatic clinical approval

P-12–P-16 — Records, sharing and reminder (approved reference set)

Implementation must recreate each constituent mobile screen as an individual route inside MobileAppShell. The reference is reused for component language; canonical routing is defined in the table below.

ID	Screen	Entry	Actions → destination	Tier
P-12	Medical Records	P-01 / Profile	Open record; upload → P-13	FE+BE
P-16	Medicine Reminder	P-01 / P-15	Add; taken; snooze; skip → P-16	FE/local; optional AI parser

P-16 — Professional medicine reminder (approved reference set)

Implementation must recreate each constituent mobile screen as an individual route inside MobileAppShell. The reference is reused for component language; canonical routing is defined in the table below.

ID	Screen	Entry	Actions → destination	Tier
P-16	Medicine Reminder	P-01 / P-15	Add; taken; snooze; skip → P-16	FE/local; optional AI parser

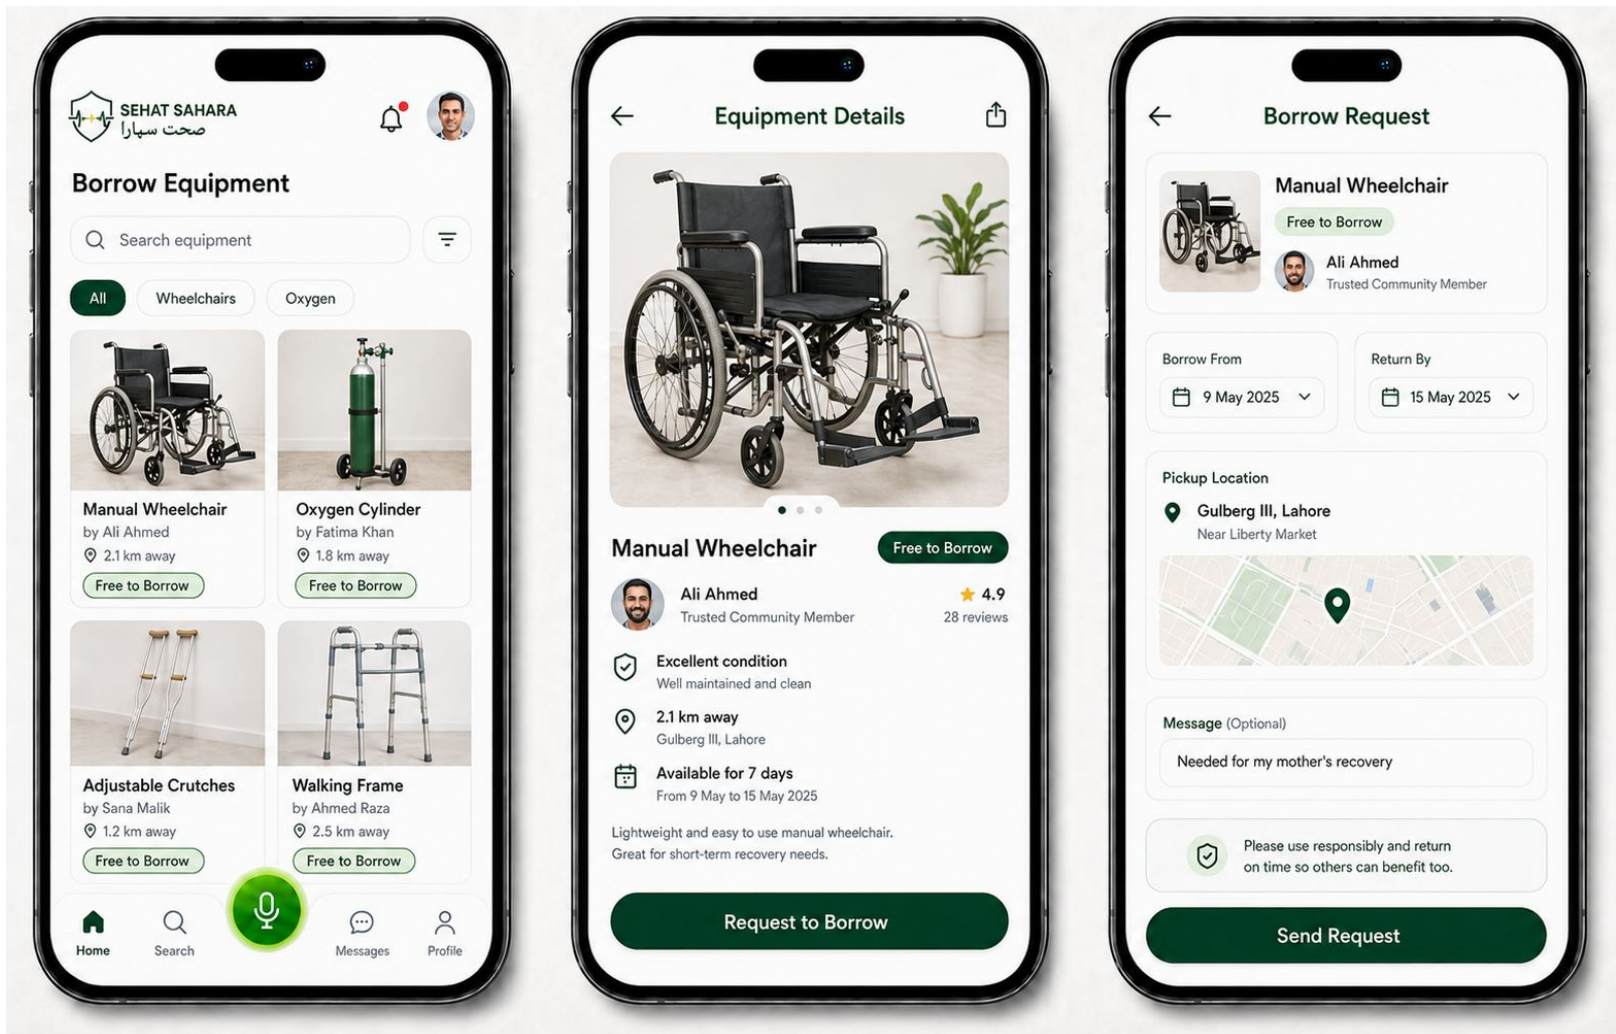

P-18–P-20 — Blood (approved reference set)

Implementation must recreate each constituent mobile screen as an individual route inside MobileAppShell. The reference is reused for component language; canonical routing is defined in the table below.

ID	Screen	Entry	Actions → destination	Tier
P-18	Blood Requests	P-17	Open; create → P-19 / P-20	Shared FE+BE
P-20	Create Blood Request	P-18	Publish; cancel → P-18	Shared FE+BE

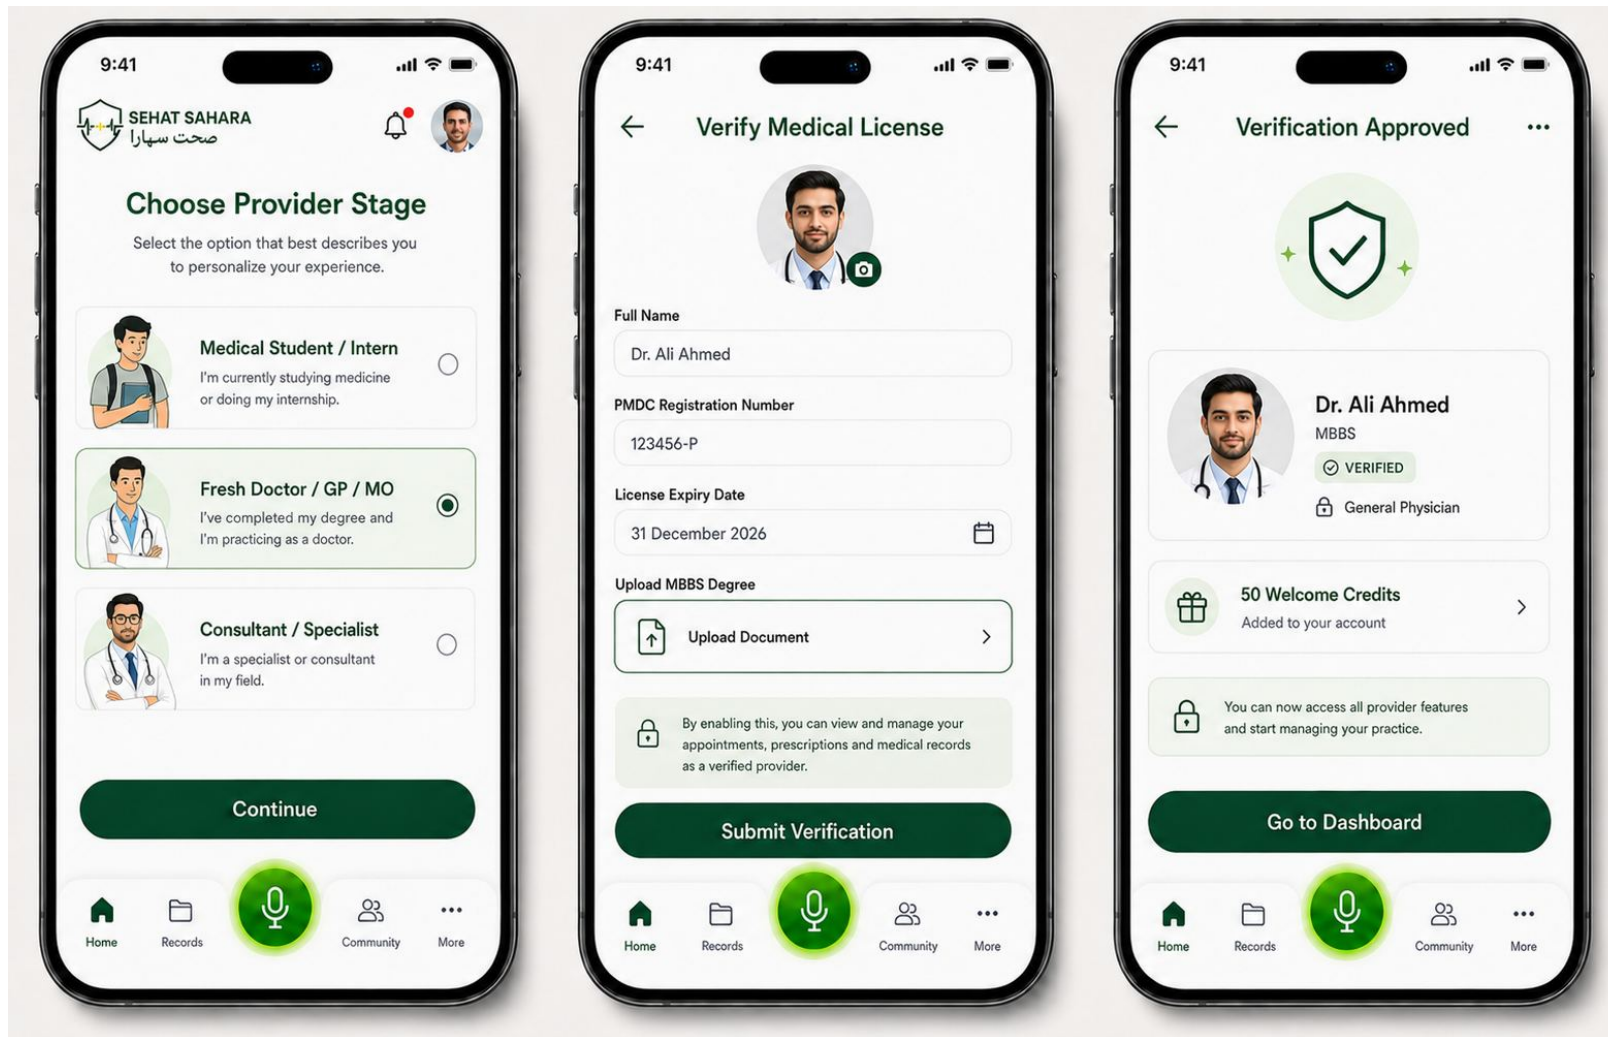

P-21–P-23 — Things sharing (approved reference set)

Implementation must recreate each constituent mobile screen as an individual route inside MobileAppShell. The reference is reused for component language; canonical routing is defined in the table below.

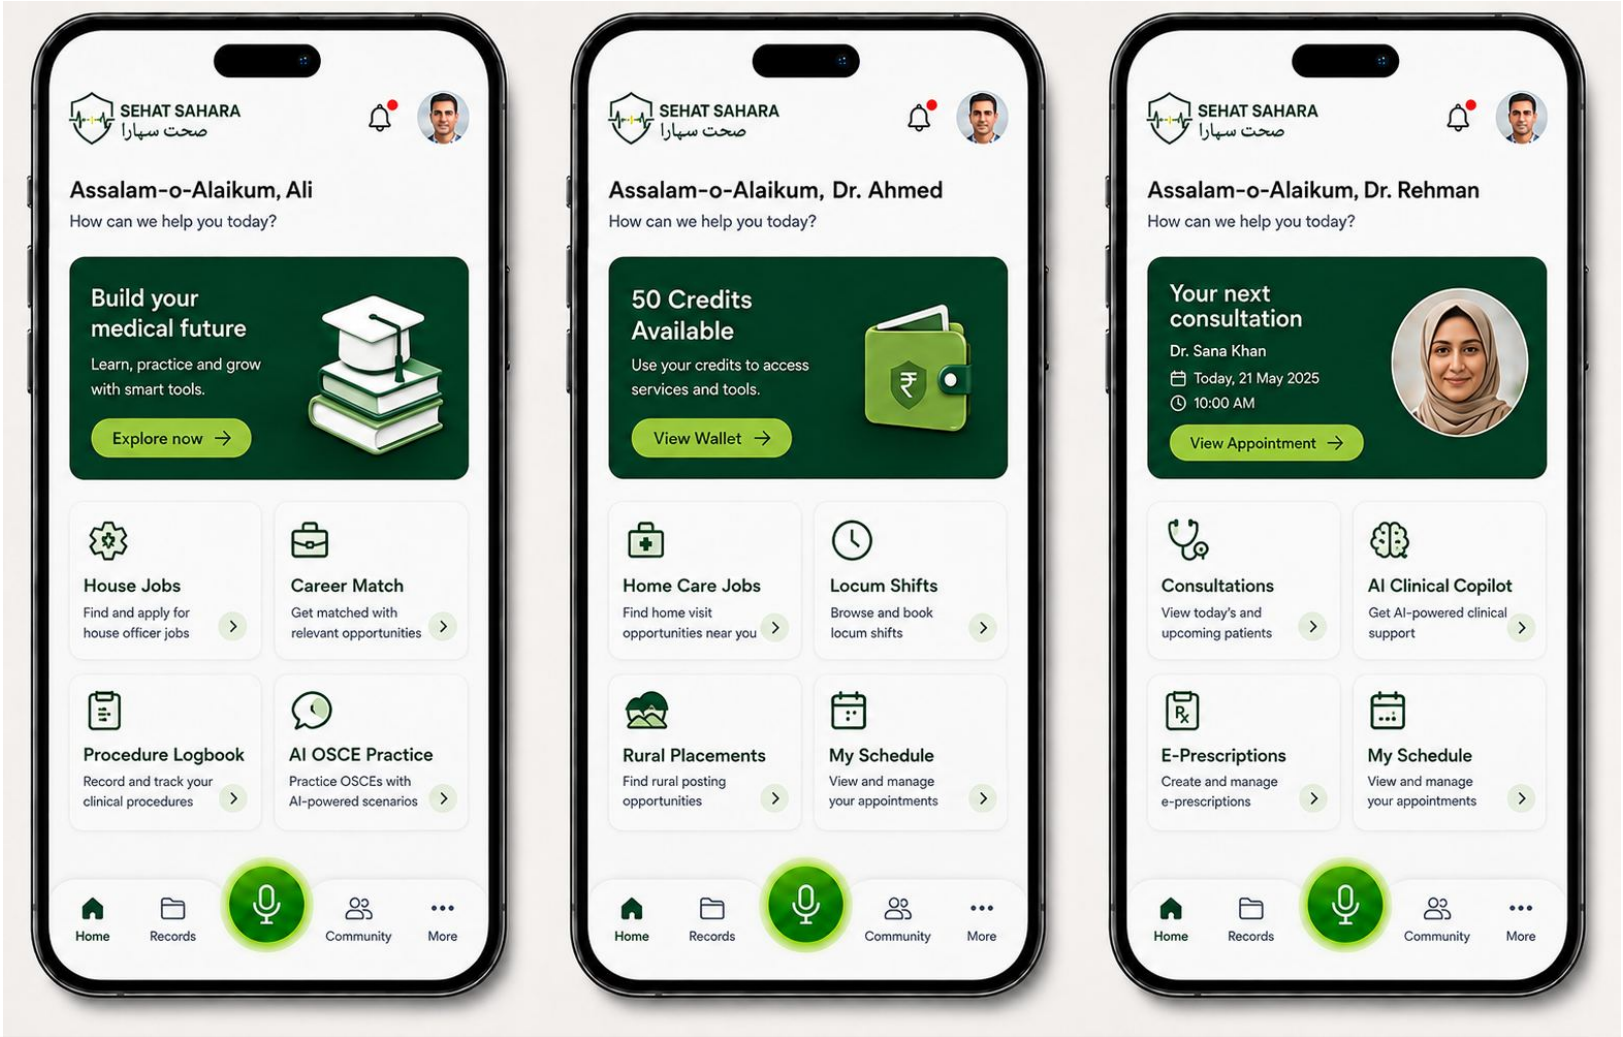

ID	Screen	Entry	Actions → destination	Tier
P-21	Things Sharing	P-17	Search; item; add → P-22 / P-23	Shared FE+BE
P-23	Add / Request Item	P-21 / P-22	Publish / send request → P-21	Shared FE+BE

Doctor MVP visual anchor 1

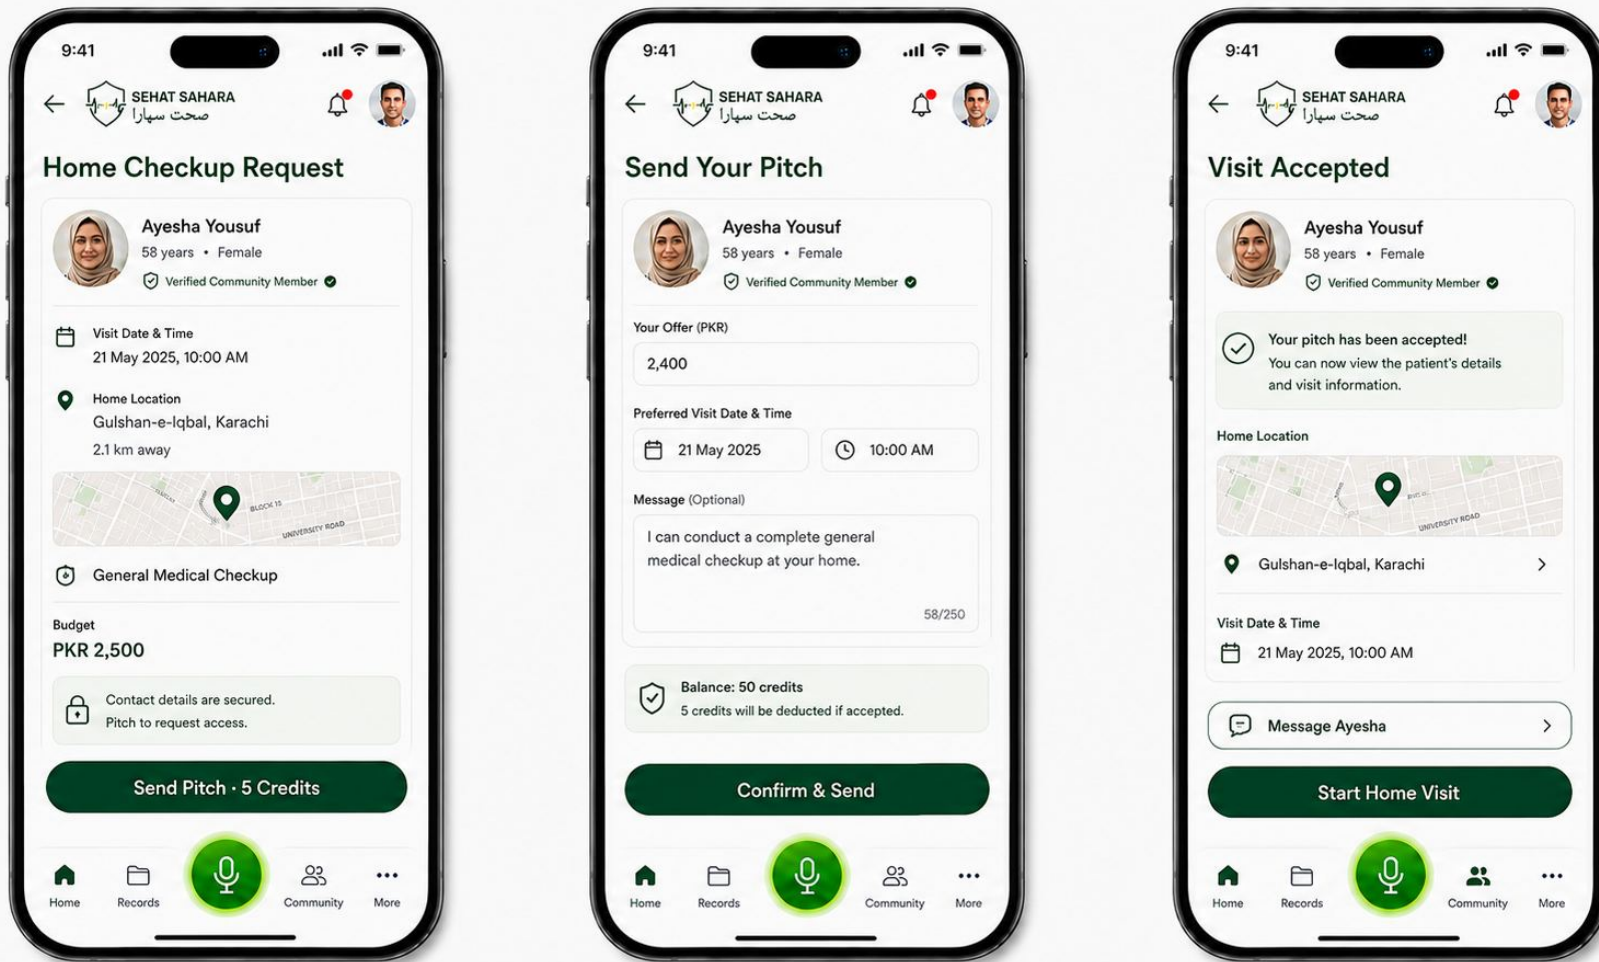

ID	Screen	Entry	Actions → destination	Tier
D-01	Dashboard	Login	Appointment card; verification; availability → D-06 / D-03 / D-04	FE+BE
D-02	Professional Profile	D-19 / public profile	Edit verified-safe fields → D-19	FE+BE
D-03	Verification Status	D-01 / D-19	Upload correction; view status → D-01	FE+BE+Admin AI assist

Doctor MVP visual anchor 2

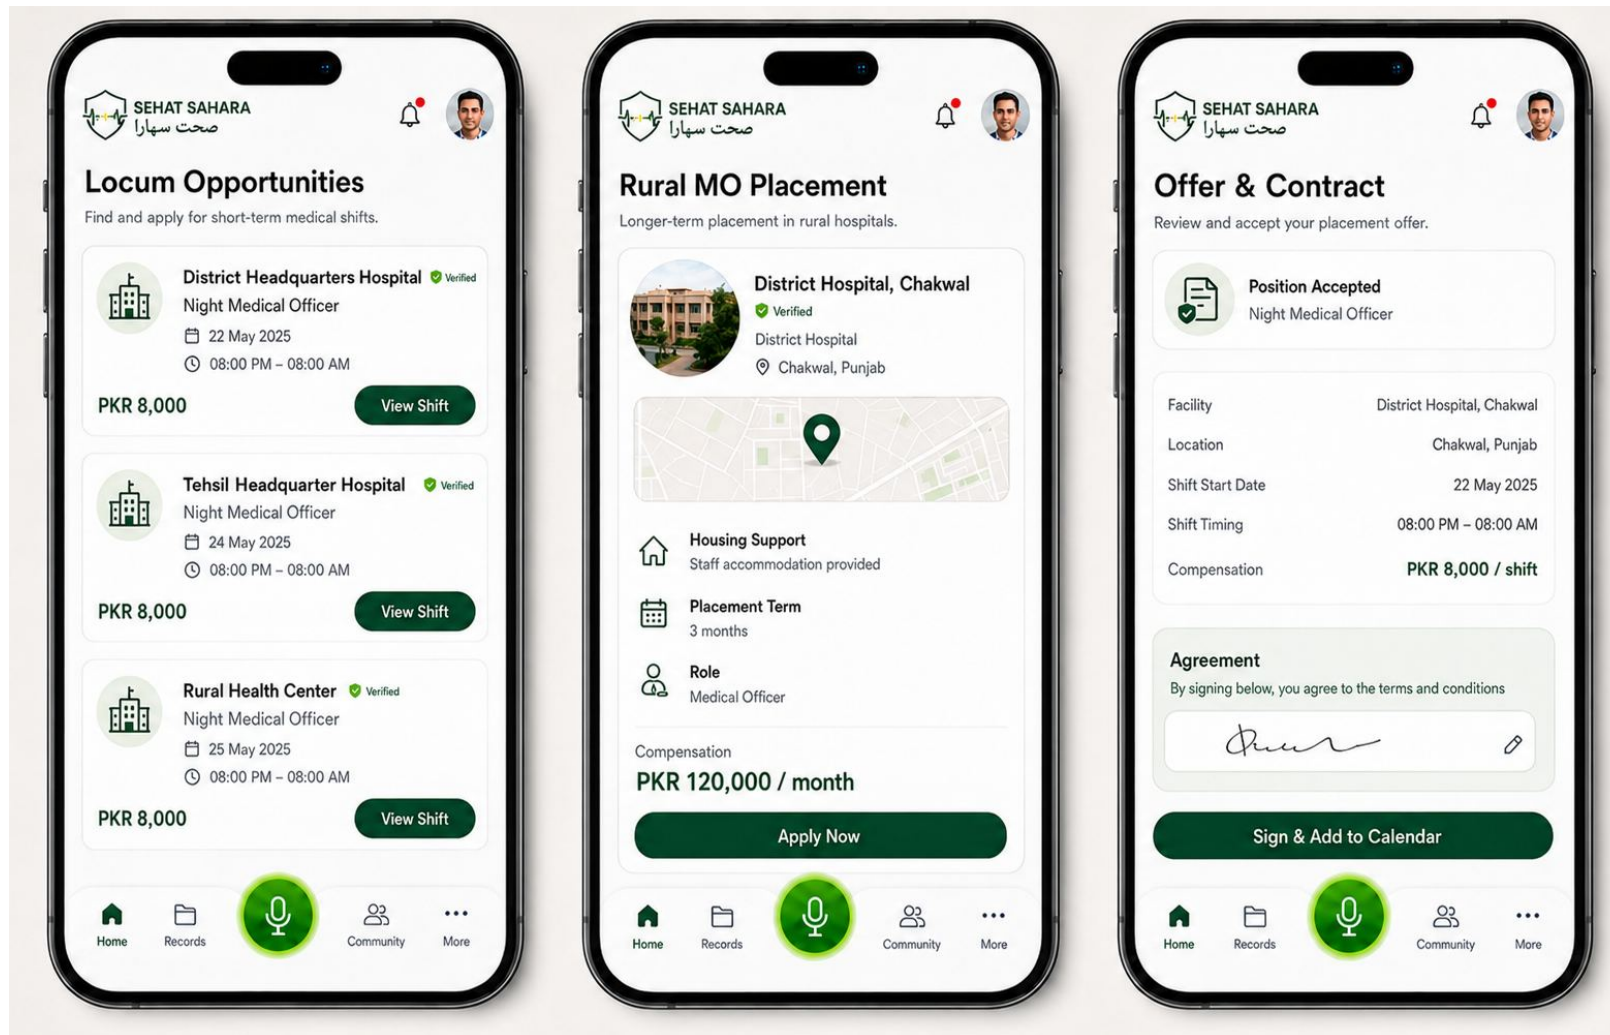

ID	Screen	Entry	Actions → destination	Tier
D-03	Verification Status	D-01 / D-19	Upload correction; view status → D-01	FE+BE+Admin AI assist
D-04	Availability	D-01	Slots; visit modes; save → D-01	FE+BE
D-05	Appointments	Bottom nav	Filter; open patient → D-06	FE+BE

Doctor MVP visual anchor 3

ID	Screen	Entry	Actions → destination	Tier
D-05	Appointments	Bottom nav	Filter; open patient → D-06	FE+BE
D-06	Appointment / Patient Detail	D-01 / D-05	Request records; start consultation → D-07 / D-09	FE+BE
D-07	Shared Patient Records	D-06	Request files; PIN; view approved → D-08	FE+BE

Doctor MVP visual anchor 4

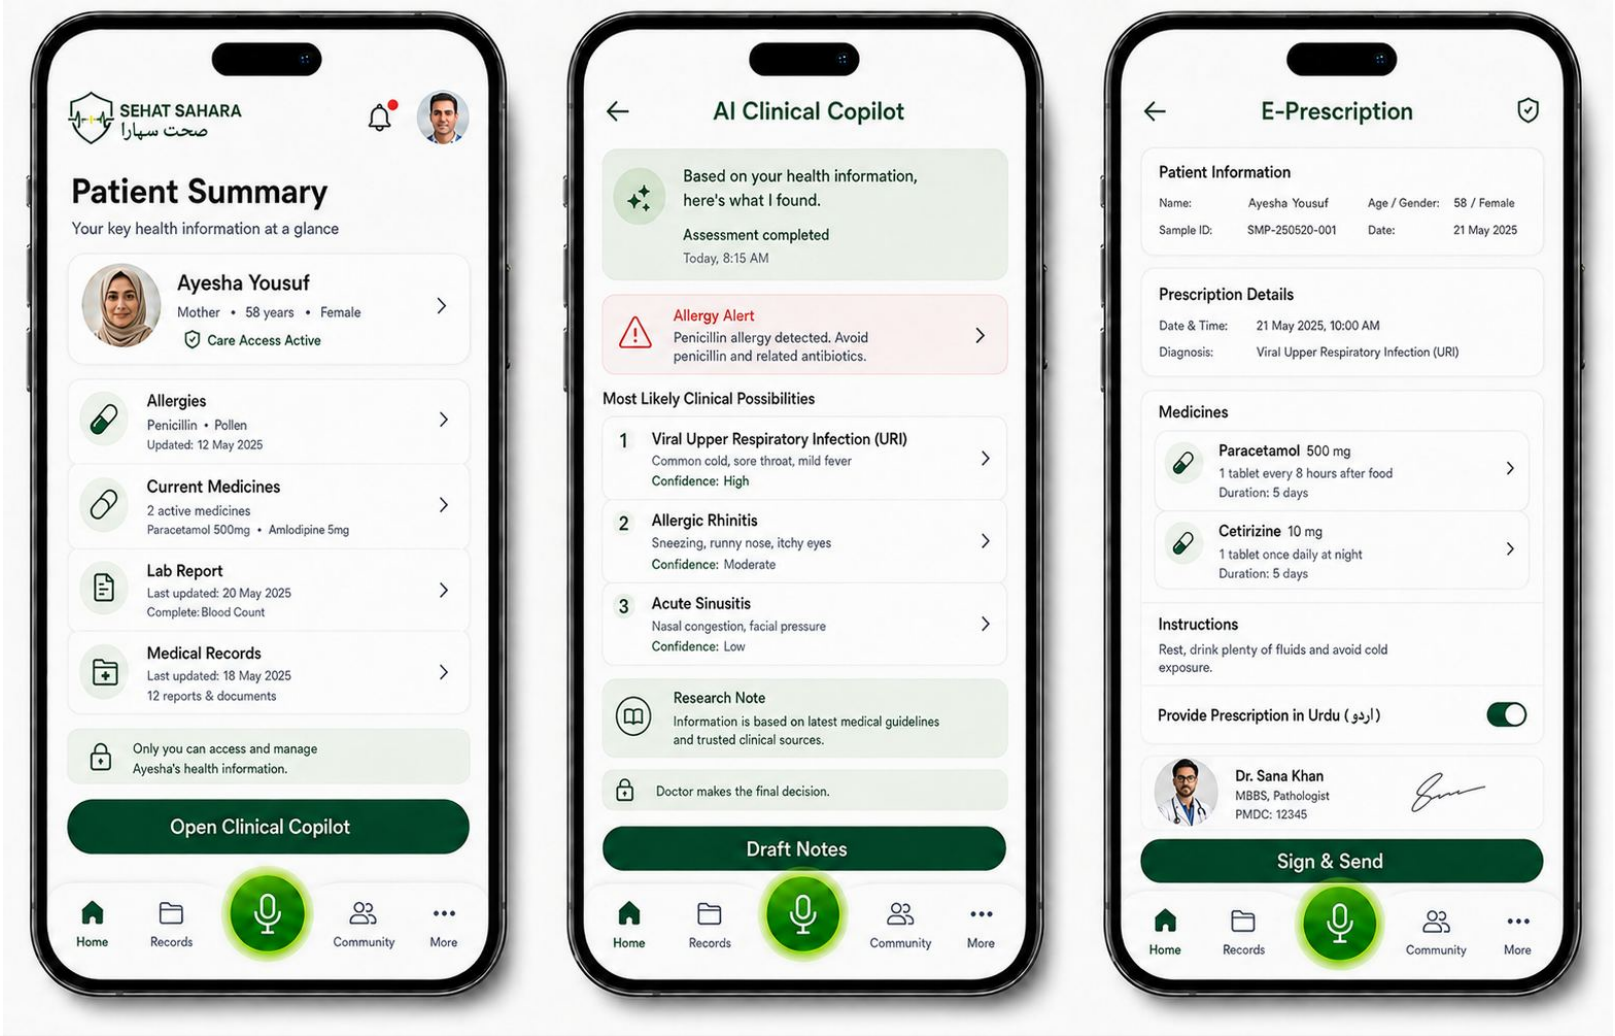

ID	Screen	Entry	Actions → destination	Tier
D-07	Shared Patient Records	D-06	Request files; PIN; view approved → D-08	FE+BE
D-08	AI Record Summary	D-07	Review citations; return → D-09	FE+AI
D-09	Consultation	D-06	Call controls; notes; emergency → D-10	FE+BE

Doctor MVP visual anchor 5

ID	Screen	Entry	Actions → destination	Tier
D-09	Consultation	D-06	Call controls; notes; emergency → D-10	FE+BE
D-10	AI Consultation Note	D-09	Edit; approve; discard → D-11 / finalize	FE+AI
D-11	Prescription	D-10	Draft; safety check; sign; send → D-06	FE+BE; optional AI formatting

Doctor MVP visual anchor 6

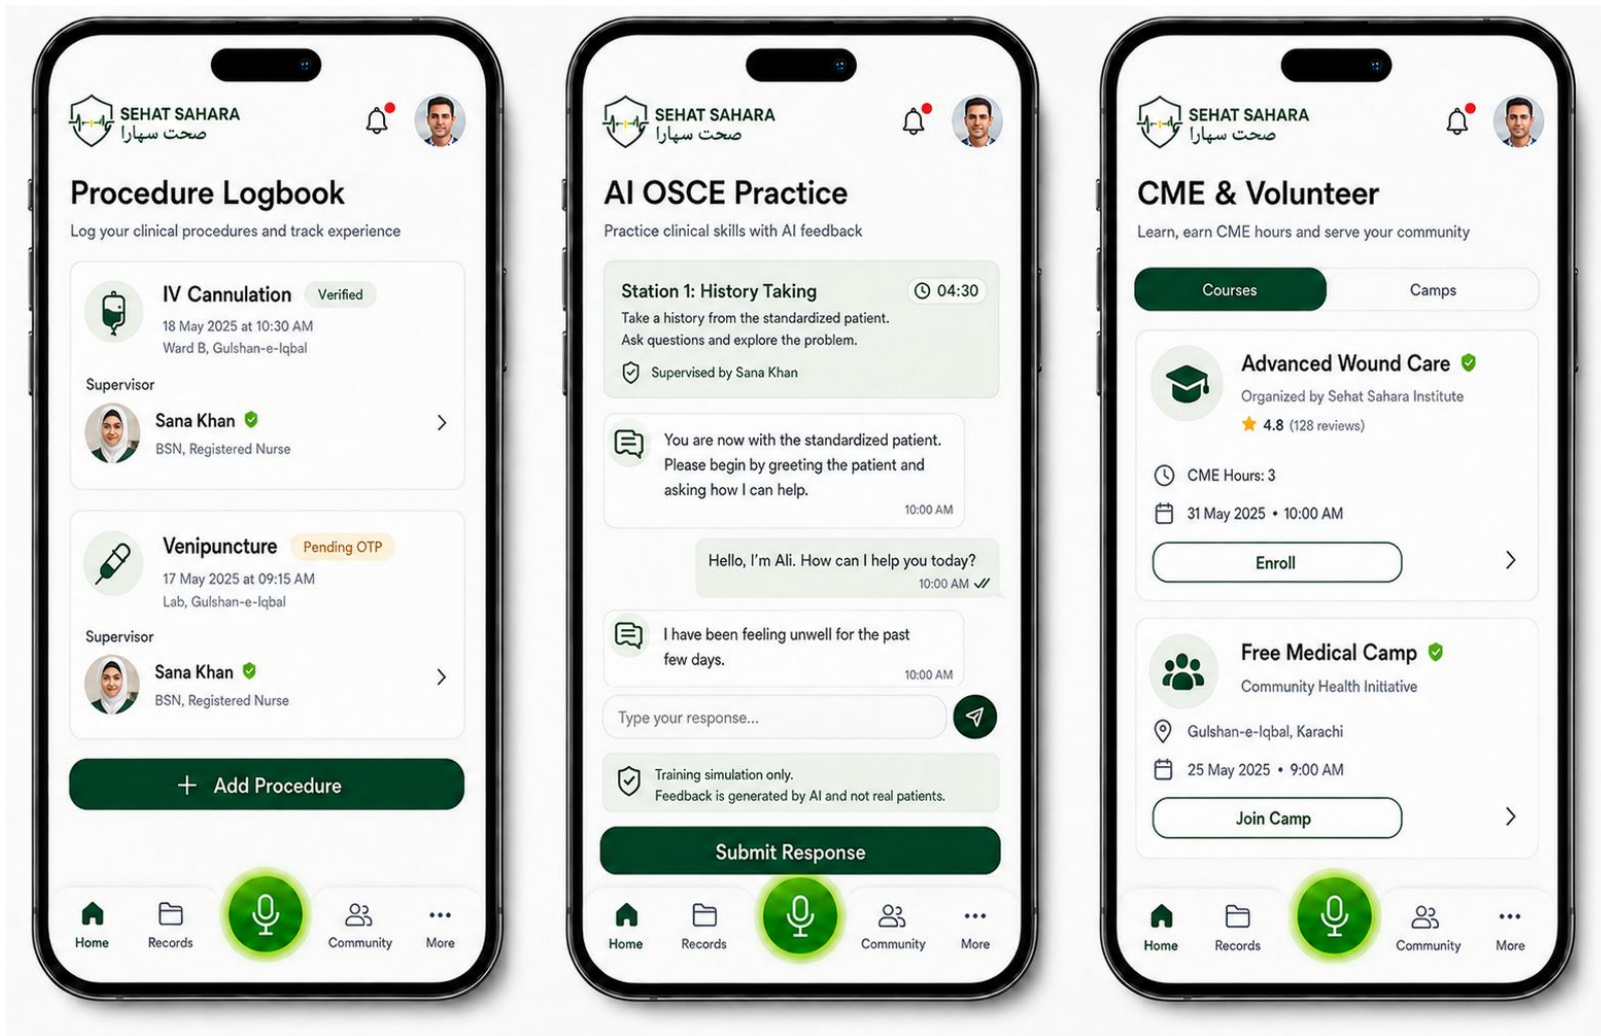

ID	Screen	Entry	Actions → destination	Tier
D-11	Prescription	D-10	Draft; safety check; sign; send → D-06	FE+BE; optional AI formatting
D-12	Jobs Board	Bottom nav	Filter by role/verification; detail → D-13	FE+BE
D-13	Job Detail	D-12	Check eligibility; apply → D-14	FE+BE

Doctor MVP visual anchor 7

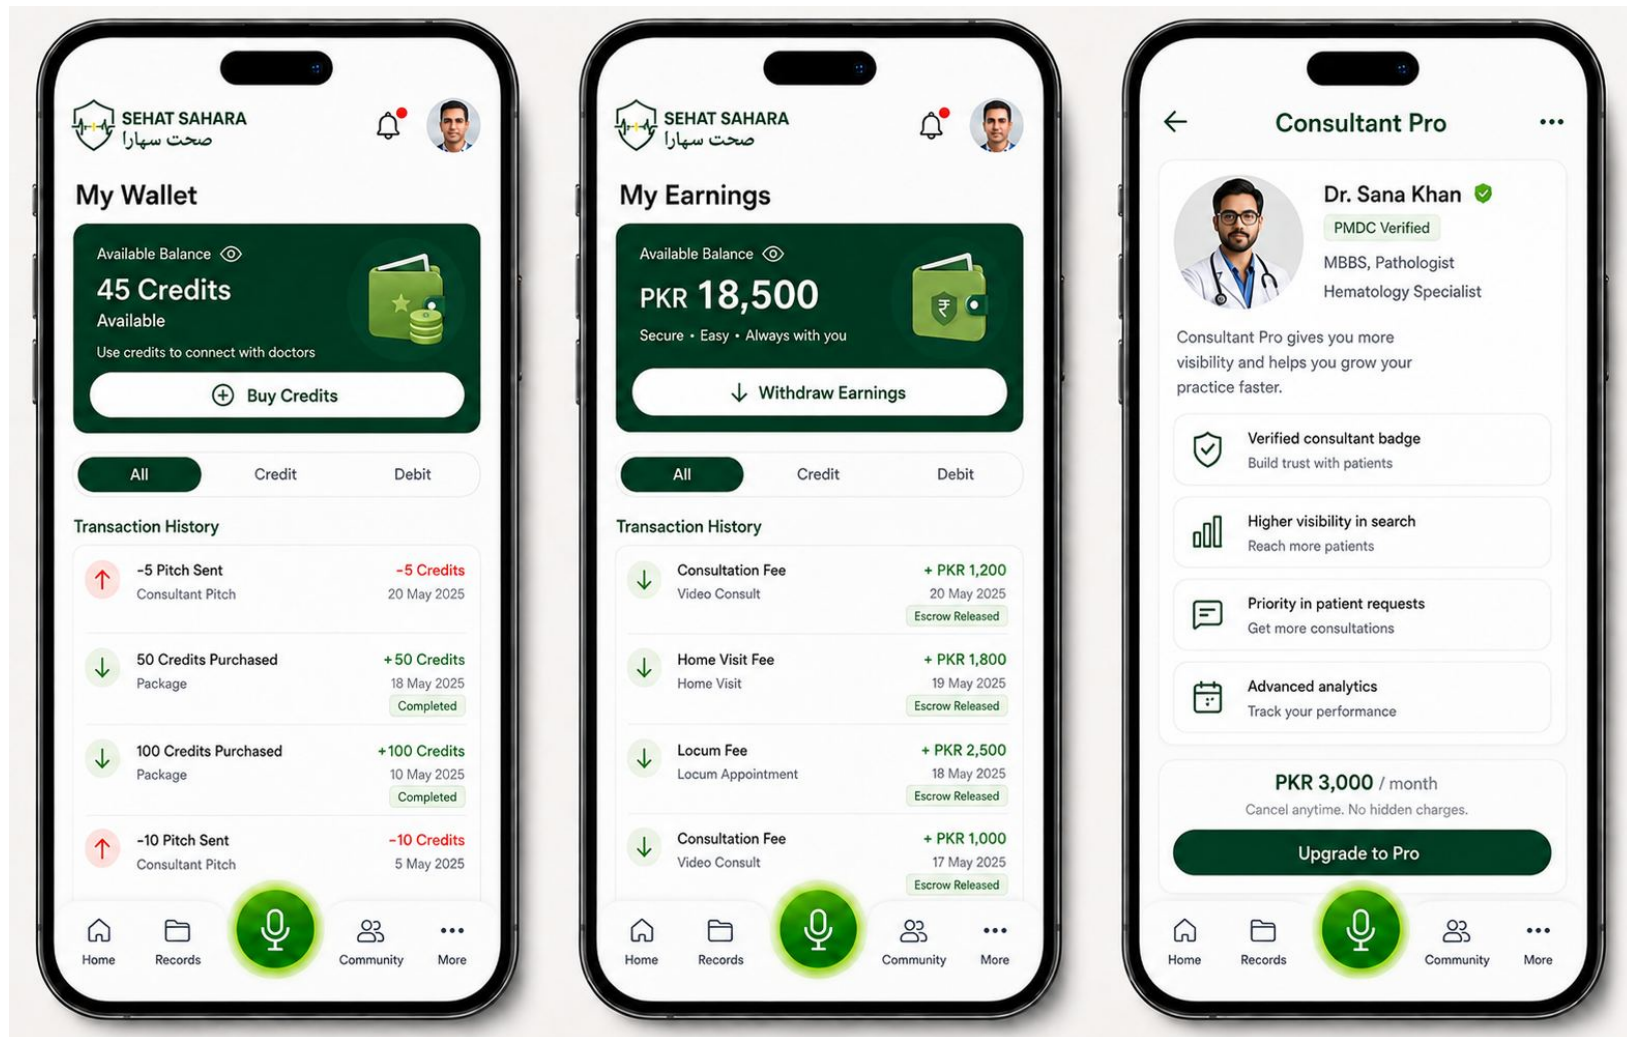

ID	Screen	Entry	Actions → destination	Tier
D-13	Job Detail	D-12	Check eligibility; apply → D-14	FE+BE
D-14	Apply Job	D-13	Pitch; availability; submit → D-15	FE+BE
D-15	Application Status	D-14 / notification	Withdraw if allowed; view outcome → D-13	FE+BE

Doctor MVP visual anchor 8

ID	Screen	Entry	Actions → destination	Tier
D-15	Application Status	D-14 / notification	Withdraw if allowed; view outcome → D-13	FE+BE
D-16	Community Home	Bottom nav	Blood; Things → D-17 / D-18	Shared FE+BE
D-17	Blood	D-16	List; detail; respond/create → Shared Blood	Shared FE+BE

Doctor MVP visual anchor 9

ID	Screen	Entry	Actions → destination	Tier
D-17	Blood	D-16	List; detail; respond/create → Shared Blood	Shared FE+BE
D-18	Things Sharing	D-16	List; detail; request/add → Shared Things	Shared FE+BE
D-19	Profile / Settings	Bottom nav	Profile; verification; security; logout → D-02 / D-03	FE+BE

Dependency-Based Implementation Chunks

Implementation Chunk	Deliverable / exit criteria
01 Foundations	Tokens, MobileAppShell, DashboardShell, routes, role guards, Service interface
02 Admin identity	A-01–A-07; verification and facility creation integrated
03 Booking/queue	P-05–P-11 + D-05/06 + H-05/06; synced status
04 Consent/care	P-12–16 + D-07–11 + H-08/09; strict file scope
05 Hiring	H-10→H-11→D-12→D-13→D-14→H-12→H-13→D-15; role, verification and specialty eligibility
06 Community	Shared C-01–12 reused by P/D + A-08 moderation
07 AI/Demo	Four AI adapters, deterministic scenarios, safety fallbacks
08 Hardening	Responsive, route, permission, empty/error, accessibility, regression checks

Regression and Integration Checklist

Check	Pass condition
Routes	Every canonical ID has entry, destination and Back; zero orphan/dead route
Permissions	Patient/Doctor/Facility/Admin actions blocked outside role
Consent	No doctor/facility can browse full patient drive
Verification	Only Admin finalizes; AI is assistive
Facility boundary	No self-signup, pharmacy, lab, IPD, CRM or old enterprise modules
Community	Blood + Things only; shared backend/components
Modes	STATIC/DEMO/API use identical interfaces and models
Mobile	Five nav items; full-screen mobile; md+ mockup only
Desktop	One complete uncropped screen; persistent simple sidebar
Events	Booking, token, share, prescription, hiring and moderation reconcile after refresh
